Title of Thesis Project

Attachments

1. A 2-3 page double-spaced thesis proposal that briefly describes the experimental question and the rationale for this experiment. Also, include the methods you will use to explore this question and the results that you expect to gain. It is important that you include the project's relevance to current biological research.
2. A Department of Integrative Biology course authorization form (found at www.integrativebiology.wisc.edu).

The Zoology Major Program Committee must approve the senior honors thesis/senior thesis proposal before a student can register for **Senior Honors Thesis: Zoology 681** or **Senior Thesis: Zoology 691**.

I have read this thesis proposal, and I approve of its content.

Thesis proposal received/approved by Zoology Major Program Committee.
